

PRODUCT MANAGER

Munich, Germany – 3 months, full-time

As a Product Manager your job is to discover problems that are worth being solved and develop products that solve those problems in the most user-friendly and delighting way. Your delivered product is valuable, usable and feasible. In our agile product development team you work at the intersection between business and technology to provide the best user experience – in close collaboration with designers and engineers. Together you envision the product, which requires you to research your customers and the problems they have that you're trying to solve. During the project you will define and iterate the product as you go, solve problems as they pop up and closely manage scope so you can get the right product out on time.

What we offer:

- Working in a diverse team of Designers, Software Developers and Product Managers who are passionate about building great digital products
- A unique opportunity to be part of our 3-month training program of the Digital Product School
- Collaboration with the best international start-ups, industry leaders, researchers and technology
- A breathtaking workplace in the Highlight Towers Munich, including access to the latest AI technology by IBM Watson IoT
- Grants (500 EUR per month)

Responsibilities:

- Solving real-world problems through working with several industry partners
- Defining a product vision and strategy
- Applying suitable user research methodologies and conducting usability tests to deliver valuable insights for other team members
- Conducting user experiments at any stage of the product development process
- Collaborating with Designers, Software Developers and stakeholders to build a valuable, feasible and usable product
- Defining and measuring KPIs for ensuring your product's success
- Involving stakeholders via workshops

Basic Qualifications:

- You are a student or recent graduate (business, computer science, psychology or similar).
- You've got a passion for creating and trying out new things.
- You are interested and knowledgeable in digital trends, technology, and culture.
- You've got the ability to thrive under pressure and function effectively in a fast-paced environment and to provide strong leadership
- You have a deep interest in creating and analyzing products and markets.
- You've got excellent analytical, problem-solving, organizational and interpersonal skills.
- You can communicate clearly – verbally and written.
- You are a cross-functional influencer with the ability to build strong relationships between people.
- You've got a good sense for design
