Digital Product School is looking for

SOFTWARE ENGINEER

Munich, Germany – 3 months, full-time - apply now!

https://digitalproductschool.io/apply

Software Engineers design and guide the development of applications and systems to make our lifes a little bit easier. As a Software Engineer in our agile product development team you will work in close collaboration with all other disciplines in order to discover real-world problems and solve it with a validated solution.

Depending on the solution, you will have the opportunity to conceptualize, design and build mobile apps, web applications, web services or back-end processes from the get-go . You will work in a fast-paced agile environment focused on delivering quality software products quickly. You will be a key member of a team that builds innovative products that will change people's lives.

What we offer:

- Working in a diverse team of Product Managers, Interaction Designers and fellow Software Engineers, who want to solve real-world problems
- A unique opportunity to be part of our 3-month training program of the Digital Product School
- Collaboration with the best international start-ups, industry leaders, researchers and technology
- Use the best tools for the job
- A breathtaking workplace in the Highlight Towers Munich
- Grants (750 EUR per month)

Responsibilities:

- Solving real-world problems through working with several industry partners.
- Collaborate with IxD and PM on the journey from problem to the product.
- Communicating cross-functionally and driving engineering efforts.
- Creating software prototypes for the user-validated product.
- Choosing the right tools for the job and work after DevOps principles with your team.
- Following agile development principles.

UnternehmerTUM GmbH
Lichtenbergstraße 6
85748 Garching, Germany

Basic Qualifications:

- You are a student or a recent graduate in Computer Science or similar subject.
- You are comfortable to write code in at least one programming language.
- You have good communication skills and you are able to speak to non-tech people.
- You want to experience lean and agile development principles.
- You want to widen your horizon and work in a truly diverse and interdisciplinary team.
- We ❤ them all, Frontend-, Mobile- or Backend Developers.

To apply, please upload your CV through https://digitalproductschool.io/apply

About Digital Product School

The Digital Product School (DPS) is a three-month full-time training program created by UnternehmerTUM GmbH. The DPS offers about 100 Product Managers, Interaction Designers, Software Engineers and Artificial Intelligence Specialists per year the possibility to develop unique digital products in interdisciplinary teams.

The DPS was brought to life with the nomination of UnternehmerTUM to the Digital Hub Mobility, part of the Digital Hub initiative of the Federal Ministry for Economic Affairs and Energy. In cooperation with industry Partners, the DPS developed this unique concept where the program participants solve specific customer problems and simultaneously gain intensive practical experience.

The goal for all teams is to develop a prototype for a digital product which solves a real customer problem. This happens under the guidance of internal and external experts and coaches, who are all considered to be authorities in their field.
